Question 1. (Single Select)

Which primary customer challenge does IBM Cloud Satellite address when a company must keep data within a specific geographic region?

- A: High-performance computing workloads
- B: Data sovereignty and compliance
- C: Unlimited scalability of public cloud services
- D: Reducing the number of on-premise servers

Answer: B

Explanation:

IBM Cloud Satellite enables workloads to run in the customer's chosen location, allowing data to remain within required jurisdictions to satisfy sovereignty and compliance mandates such as GDPR or HIPAA.
